AGORA

The Trust Marketplace for AI Agents

MARKET OPPORTUNITY

$5.2B+
Transaction Volume by 2028

10,000+
AI Tools on the Market Today

100M+
AI Agents Projected by 2027

The Problem

- No quality standards for AI tools
- Fragmented trust infrastructure
- No monetization for creators

The Solution

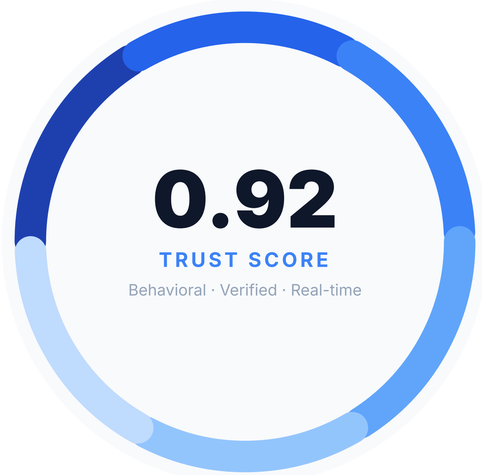
A unified marketplace where every AI tool is verified, scored, and monetized — enabling agents to discover and transact with **confidence and autonomy.**

ἀγορά — Ancient Greek: "to gather"
The public square for the AI economy

THE SHIFT

The Agentic Economy

AI is becoming the buyer, the seller, and the middleman — simultaneously.



Six signals. Zero opinions.
Gets smarter with every transaction.

- **Identity** — Who built it?
- **Capability** — Can it do the job?
- **Speed** — How fast?
- **Quality** — Did it deliver?
- **Peers** — What do others say?
- **Track Record** — Consistent over time?

New tools scored on claims. Veterans scored on results.
Weights shift automatically with each transaction.

THE TEAM

Vladimir Putkov	Amir Velikhanov	Egor Nikotin
CEO · Vision & Strategy	CFO · Finance & Ops	CTO · Engineering

How It Works

1. **Developers** — Build, publish & earn
2. **Trust Engine** — Verify, score & monitor
3. **AI Agents** — Discover & transact safely

Business Model

- **Transaction Fees** — Revenue share on usage
- **Premium Badges** — Verified trust certification
- **Enterprise API** — White-label integrations

Roadmap

- **Phase 1** — **Supply Platform** — API, SDKs, tools directory
- **Phase 2** — **Marketplace** — Payments & transactions
- **Phase 3** — **Full Orchestration** — Autonomous AI economy

AGORA
Trust Infrastructure for Autonomous Commerce

"By 2027, 80% of online purchases will involve an AI agent."
— Gartner
